COMMON QUESTIONS

الاسئلة الشائعة

WHAT IS CYBERSECURITY?

Cybersecurity refers to the practice of protecting computer systems, networks, data, and digital information from cyber threats, attacks, and unauthorized access.

WHATS AN ETHICAL HACKER ?

An ethical hacker, also known as a "white hat hacker," is a cybersecurity professional who uses their skills and knowledge to identify vulnerabilities, weaknesses, and security flaws in computer systems, networks, applications, and digital environments. Ethical hackers follow strict ethical guidelines and work with organizations to improve their security posture by identifying and addressing potential risks before malicious hackers can exploit them.

WHO IS THE SCRIPT KIDDIE ?

is a term used in the world of cybersecurity to refer to individuals who lack deep technical knowledge or skills but still attempt to launch cyber attacks using pre-made tools, scripts, or software developed by more skilled hackers. Script kiddies rely on automated tools and exploit scripts to launch attacks without fully understanding the underlying mechanics.

White Hat Hacker

White hat hackers are ethical hackers who use their skills to identify and fix vulnerabilities in systems. They work to improve security by helping organizations discover weaknesses before malicious hackers can exploit them. White hat hackers often work in cybersecurity firms, perform penetration testing, and participate in bug bounty programs.

black hat hacker

Black hat hackers are individuals who engage in hacking with malicious intent. They exploit vulnerabilities to gain unauthorized access, steal sensitive information, and cause harm. These hackers engage in illegal activities and are the ones often associated with cybercrime

Grey hat hacker

Grey hat hackers fall somewhere in between white hat and black hat hackers. They may identify vulnerabilities without permission, like black hat hackers, but they often disclose these vulnerabilities to the affected parties or the public, similar to white hat hackers. Grey hat hackers can be controversial because their actions sometimes straddle the line between ethical and unethical behavior.
